EXPERIENCE

Chief Executive Officer

IdomSoft Zrt. 2024 - Present

Deputy CEO of Digital Solutions

IdomSoft Zrt. 2022 - 2024

Chief Operating Officer, Deputy CEO

IdomSoft Zrt. 2021 - 2022

IdomSoft Ltd., as a member of NISZ group, is a 100 % indirect state-owned company, playing a leading role in the development, integration, installation and operation of IT systems of national importance.

- Leading a 400+ team, including engineering, product / project / portfolio management
- Rethinking and optimizing the organization
- Working on organizational culture

CTO, Chief Services Officer, Deputy CEO

IdomSoft Zrt. 11/2019 - 05/2021

Company Description

- Leading a 100+ team of system engineers, architects and service managers
- Supporting the transition from old systems to a new mindset
- Providing new aspects for the cultural and professional evolution
- Moderating and supporting the collaboration between software engineers and system engineers

Senior Director of Engineering | LastPass

LogMeIn 11/2018 - 10/2019

The category leader in zero-knowledge password management, LastPass is used by more than 30 million users and 85,000 businesses worldwide and is set for strong and sustained growth as consumers and businesses continue prioritizing password security.

- Leading a 100+ engineering team on a \$80M/y product
- Building a strong engineering leadership team
- Stabilising a SaaS product for 20M customers

CTO

MMOS 01/2017 - 11/2018 Switzerland

Connecting scientific research and video games as a seamless gaming experience. Research tasks completely integrated with game mechanics, narrative and visuals can open up a new channel between the gamer and the scientific community.

- I have built a robustness, scalable architecture for serving AAA games
- I work with the scientific side together and helped them to find the right tools for Citizen Science
- Helping the scientific side with data analysis

MAIN PROJECTS

Digital Citizenship Program

2023 - Present

The goal of the Digital Citizenship (DÁP) application is to support citizens in their everyday administrative tasks through a unified digital platform, using modern, easy-to-understand language and user-friendly solutions.

- What was a successful outcome of your work? (e.g. Raised \$3,000 for the charity)

Árfigyelő

2023

The aim of the application is to create a user-centered, modern service that allows price-conscious citizens to easily and efficiently compare the best offers from reliable, verified sources across an ever-expanding range of product categories.

- What was a successful outcome of your work? (e.g. Raised \$3,000 for the charity)

Hungarian Election System

2021 - Present

Leading the IT software preparing for the Hungarian parliamentary election in 2022 and 2024.

Moving / renewing the main parts of the national digital data asset

2019 - 2021

Infrastructural and architectural renewing of the Hungarian national data asset, including: person and address register, supporting services of border control system, passport and (e)id systems, vehicle registration system, driving licence register.

- Technical leading
- Transforming the organization
- Building strategy

LastPass

2018 - 2019

Main goal was the integration of a newly acquired startup - team and platform - into the LastPass world.

EXPERIENCE

Head of Product Development

Virgo Systems

📅 2014 - 2017

A digital powerhouse specialized in UX/UI design, software development, e-commerce, agile methodology and startup incubation.

- Founder and managing CTB, the Chief Technology Board of Virgo
- I defined company strategy with the top management
- I made the methodology of Product Validation Workshop based on lean inception and inception deck

CTO / Senior Consultant

Virgo Systems

📅 2009 - 2014

- Helping companies transform their problems and business processes to IT processes
- I have learnt a lot about technology, people and leadership roles
- I faced the performance issues on iWiW and finally won
- Maintaining a high performing development team

Lead developer

KIROWSKI (DENTSU CREATIVE HUNGARY)

📅 2000 - 2004

One of the biggest digital agency in Hungary

- I have built COSMOS, the CMS platform of Kirowski
- I became the technical leader of the biggest projects

Developer

ModerNet

📅 1998 - 2000

EDUCATION

IT Teacher

University of Szeged, Juhász Gyula Faculty of Education

- Unfinished

MAIN PROJECTS

Project Discovery

📅 2017 - 2018

Project Discovery is a mini game in Eve Online, the biggest sci-fi MMORPG developed by CCP. Players help the Observatory of Geneva to find exoplanets which have not been discovered by AI.

- 110M classifications
- Involving more than 200K players
- One of the biggest Citizen Science projects

iWiW

📅 2004 - 2010

First I was chief technology officer on the product, after the acquisition by Magyar Telekom I helped the product team with evolution strategies. The iWiW API was my brainchild and I was an active part of its design.

- iWiW was sold for 1.5B HUF in 2006, after 8 months
- iWiW had more than 4M people, with 1.5M unique users per day at the top
- One of the iWiW API clients is a \$1M company now

Apptalk Ninja

📅 2016 - 2018

Apptalk Ninja is a co-founded product by Virgo Systems and me. Apptalk monitors and logs your mobile application's data transfer over bluetooth, BLE, as well as http, enabling the debugging of currently hard to track errors of communication between smartphones and connected hardware devices.

- Building an MVP in 3 months
- We got 100M HUF investment
